

**A Cloud based system to manage operations of mid to large size Imaging Center**

### KEY FUNCTIONALITIES

- Capturing patient demographic information
- Capturing patient's encounter (visit) data in customized format
- Document Printing – Consent Printing, Bill / Receipt printing
- Email support– specific reports can be sent to referral doctor through Email
- Reports – Patient List, referral doctor's analysis, Payment/Accounting
- Solution on Cloud - No local set up is required
- Generate and Print Template based reports Referral doctor's analysis

**Sophisticated Pharmacy Management System for In-hospital and/or retails Pharmacy**

### KEY FUNCTIONALITIES

- Transactions - Purchase, Purchase Return, Sales, Sales Return, Adjustment
- Batch wise issue and tracking for medicines
- Cash or Credit bill generation – allowing user to maintain track advance, partial or full payment
- GST Register / Tax Reports
- Expiry item management – report gives expired / nearing expiry medicines list
- Daily cash collection report helps cashier to handover to next person in shift.
- Stock statement and detail ledger
- Reorder report - Static Reorder report generation based on reorder level set in product.  
Dynamic reorder report based on the sale of medicine for given number of days
- Supplier & Manufacturer Information: It is again vital as this keeps a record of the supplier/manufacturer information from whom you buy the medicines/ who is responsible for the manufacturing of those medicines.
- Various MIS reports

**Full blown system for Pathology Laboratory and blood Bank Management**

### KEY FUNCTIONALITIES

- Patient registration
- Creating LAB test request directly or receiving request automatically via HMS
- Bar code label printing
- Interface with various LAB Instruments – helps to auto populate test results
- Configurability of test results calculations, define set of valid values, LCL-UCL, etc.
- Upon completion of LAB test, results are visible to doctors directly in HMS
- LAB Reports are digitally saved as part of patient record management system
- Data security – Once reports are approved, same cannot be modified by LAB technicians
- Supports multiple price lists
- Well defined user access control
- SMS/Email support for results / report sharing
- Template based LAB Reports
- Printing of reports in plain or pre-printed stationary

**Electronic Document Management Solutions for healthcare organization**

### KEY FUNCTIONALITIES

- Scan / capture and store physical patient record (external) digitally
- Auto generate & store documents (like OP/IP Bill & Receipt, Advance Receipt, First/Follow-up Consulting, Consents, Discharge slip, Discharge summary, LAB Reports, other certificates, etc. ) digitally through HMS
- Default and Customized folder to store documents
